TI - PICTURE READER

AB - (JP07135553)

PURPOSE: To simplify the reading of a transparent original DT by reading the transparent original DT without need for a large scale of magnification projector.

CONSTITUTION: A transparent original to exhibit a transparent original DT such as a 35mm film is set to a predetermined position of an original platen 31. The transparent original DT is lighted from the outside of a reader main body 30 by a projection unit 70. The projection unit 70 leads the light from a light source 35 in the reader main body 30 to the transparent original exhibit section 32. When the transparent original DT is read, an auxiliary scanner 50 is interposed to be interrupted in an optical path at reading of a usual original. The light from the transparent original DT is bent by the auxiliary scanner 50 and led to a light receiving face of an image sensor 40.

When a rotating plane mirror 53 of the auxiliary scanner 50 is turned by an angle, the area of a picture made incident onto the image sensor 40 is changed and the scanning for the transparent original DT is attained.
